

Secudrive USB Drive Solutions protect your confidential data by controlling user rights and with remote management in and out of office premises for work productivity

Secure data sharing, on the move.

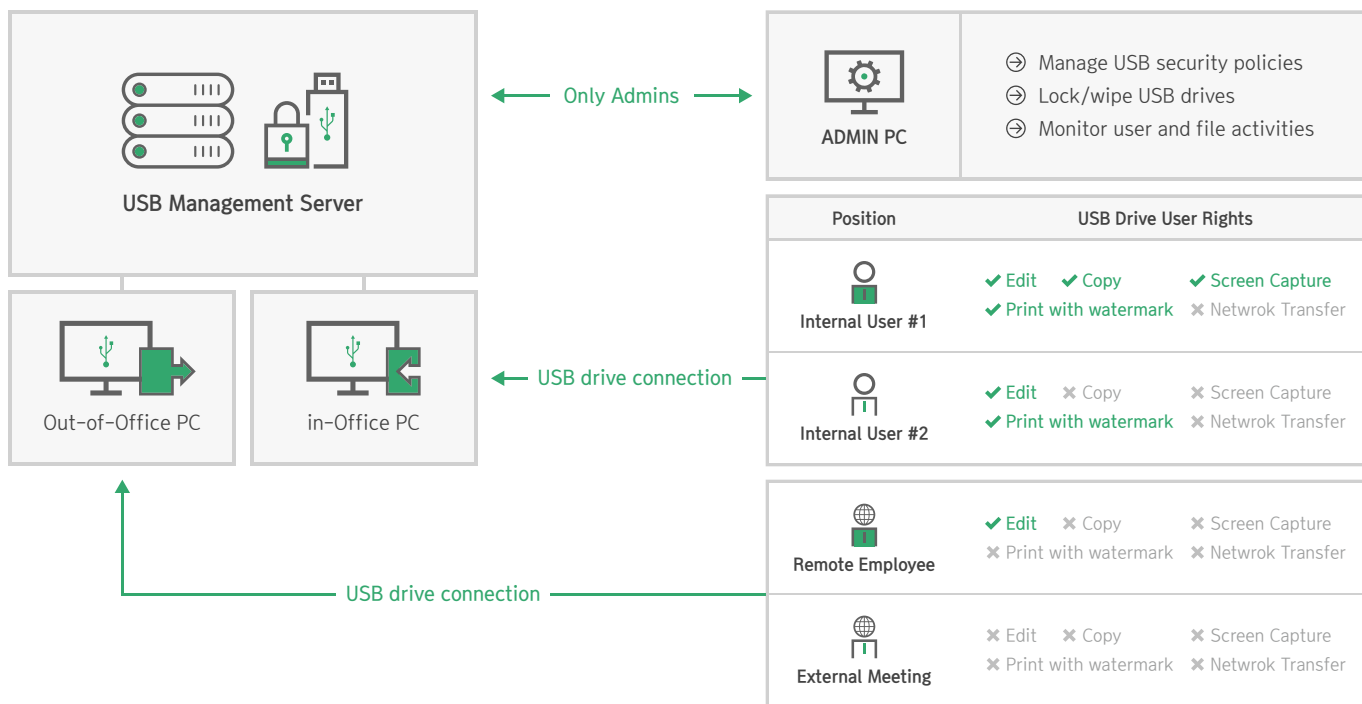

Common USB drives are often blocked to protect confidential data from leakage, despite the obvious practicality for file transfers and access, in and out of office. This is because they are not equipped with data security. Thus, enterprises suffer from drop in work productivity and collaboration, in and out of office. Secudrive USB Drive Solutions help enterprises to safely manage the storage and transfer of confidential data with HW-encryption, user rights management, and anti-virus.

Data security goes the extra mile.

Enterprises find it reluctant to use USB drives as they are difficult to manage in numbers, as different drives serve different purposes and have distinct security policies. Moreover, theft or loss can risk the data confidentiality if the USB drives fall into the wrong hands. Secudrive USB Drive Solutions feature USB Management Server (UMS) to help enterprises to remotely manage security policies, collect file/user activity logs, and lock/wipe multiple Secudrive USB drives from a centralized console.

Secudrive USB Drive Solutions **Basic / Office / CAD, UMS**

- ⊕ Innovative, HW-encrypted USB drives integrated with user rights management for unrivaled insider threat prevention
- ⊕ Establishes secure workspace where users can share and work with confidential data even out of office
- ⊕ USB Management Server (UMS) remotely manages multiple Secudrive USB drives from a centralized console

Powerful Data Security and Reliable Remote Management

HW-encryption & anti-virus AES-256 crypto-chips and Trend Micro USB Security™ 2.1 vaccine prevent data breach from external threats

User rights management restricts users' rights to copy, print, screen-capture, and network-transfer files without authorization

Application whitelisting permits only the whitelisted applications to be installed and run on the Secudrive USB drives to stop ransomware threats

USB Management Server provides real-time management and monitoring of multiple USB drives' security policies remotely for instant response to loss and theft

USB drive validity settings ensure that stored data cannot be accessed after the designated valid period or maximum number of log-ins is exceeded

Comprehensive logging provides visibility of all user and file activities in the USB drives with extensive logs for auditing

Operating System Requirements

Secudrive USB Drives

Windows 10, 8.1, 8, 7 (32-bit/64-bit)

USB Management Server (UMS)

Windows Server 2012, 2016 (32-bit/64-bit)

UMS PC Client

Windows 10, 8.1, 8, 7 (32-bit/64-bit)

Supported Applications

Documents | MS Word, PowerPoint, Excel, Access, OpenOffice, Foxit Reader, Docuworks Desk 7

Design | Adobe Photoshop, Illustrator, Flash, MS Paint, Picasa 3, Picasa Photo Viewer 3

Multimedia | Windows Media Player, VLC Media Player, BS Player, GOM Player, KMPlayer, Adobe Flash Player

Text Editor | Sakura Editor, TeraPad, EditPlus, UltraEdit, Notepad, Wordpad

Zip | WinRAR, Lhaplus, 7-zip **Web Browser** | Internet Explorer, Mozilla Firefox

CAD | AutoCAD, 3DS Max, Maya, CAM350, DraftSight, DWG TrueView 2008, DWGEditor, eDrawings, OrCAD, P-CAD Solid Edge ST, PTC Creo Parametric 2.0, CATIA, SolidWorks

Dassault Systems | Unigraphics NX **Siemens PLM** | AutoCAD MAP 3D, ArcView GIS **Siemens PLM** | EPANET
