

# Secudrive USB Copy Protection provides the most secure and economical method to distribute your contents with digital rights management and remote update

## The innovative USB Copy Protection.

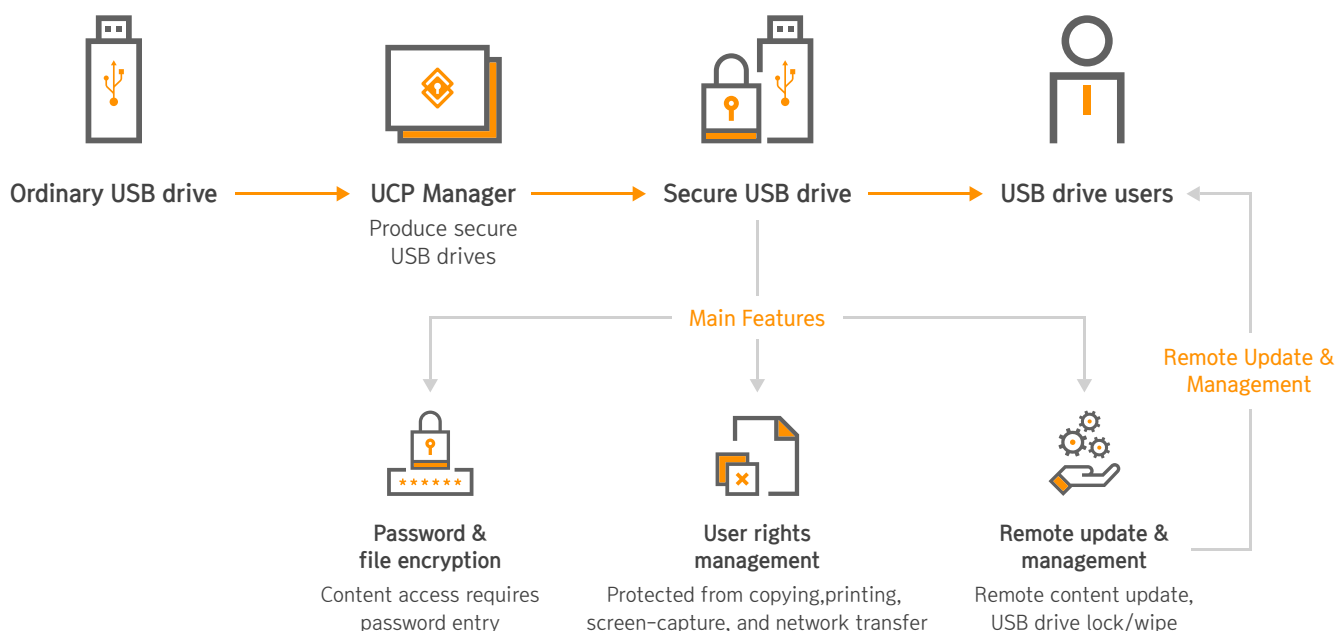

USB drives have become the prominent media for content distribution due to bigger storage and more portability. Secudrive USB Copy Protection is an innovative solution to safely distribute all kinds of digital contents by protecting the digital copyright with passwords, encryption, and digital rights management. Moreover, contents can be distributed while keeping content originality, from unique portable applications and executable files with multiple files and databases, to wide range of office and CAD files.

## Remote update and management.

Contents stored on USB drives can change anytime, and for the distributors who handle contents that require regular updates, this causes a considerable hike in costs, as they must distribute newly made USB drives. Besides, lost or stolen USB drives can compromise the security of the contents. Secudrive UCP provides remote update feature for content update without recollection or redistribution of USB drives, remote management of security policies, and remote USB drive lock/wipe.

## Secudrive USB Copy Protection (UCP) **Basic / Plus**

- ⊕ Innovative solution that converts ordinary USB drives into secure USB drives for safe content distribution
- ⊕ Password protection, file encryption, and user rights management create layered content security after distribution
- ⊕ Remote update feature of Secudrive USB Copy Protection Plus saves costs and provides persistent security

## Reliable Digital Content Security

**USB drive validity settings** ensure that stored data cannot be accessed after the designated valid period or maximum number of log-ins is exceeded

**Digital rights management** restricts users' rights to copy, print, screen-capture, and network-transfer files without authorization

**Keeping content originality** ensures that contents, even executable files with multiple files and databases, do not have to be converted to or opened by specific applications

**Mass production** allows content distributors to produce a high number of secure USB drives by using image files or USB duplicators

**Remote content update** provides distributors a cost-effective way to update contents without recollection or redistribution of USB drives,

**Remote security update** helps distributors to maintain control of distributed USB drives by being able to remotely manage security policies and lock/wipe lost or stolen USB drives

## Solution Specifics

### Solution Line-up

Features Solutions	Password & validity settings	Digital rights management	Application whitelisting	Mass production	Remote content update	Remote security update
Basic	✓	✓	✓	✓	✗	✗
Plus	✓	✓	✓	✓	✓	✓

### Operating System Requirements

**Secudrive USB Copy Protection Basic & Plus**  
Windows 10, 8.1, 8, 7 (32-bit/64-bit)

### Supported Applications

**Documents** | MS Word, PowerPoint, Excel, Access, OpenOffice, Foxit Reader, Docuworks Desk 7

**Design** | Adobe Photoshop, Illustrator, Flash, MS Paint, Picasa 3, Picasa Photo Viewer 3

**Multimedia** | Windows Media Player, VLC Media Player, BS Player, GOM Player, KMPlayer, Adobe Flash Player

**Text Editor** | Sakura Editor, TeraPad, EditPlus, UltraEdit, Notepad, Wordpad

**Zip** | WinRAR, Lhaplus, 7-zip **Web Browser** | Internet Explorer, Mozilla Firefox

**CAD** | AutoCAD, 3DS Max, Maya, CAM350, DraftSight, DWG TrueView 2008, DWGEditor, eDrawings, OrCAD, P-CAD Solid Edge ST, PTC Creo Parametric 2.0, CATIA, SolidWorks

**Dassault Systems** | Unigraphics NX **Siemens PLM** | AutoCAD MAP 3D, ArcView GIS **Siemens PLM** | EPANET
